

SB Overdrive

Electronic lock

If locks could dream, their dream would be to lock automatically when the door is closed! For SB Overdrive it's not a dream but its basic function.

Elegant design. Designed to adapt to all thicknesses and types of door profiles: wooden, aluminum, PVC, fire resistant, security, metal, sliding, sliding lifting.

Perfect application upon existing euro profile mortise locks.

Ideal for interior or exterior doors exposed to extreme weather conditions.

Automatic locking when closing the door (optional door status sensor) or programmable locking.

It does not require wiring for its installation.

The mechanical key continues to be able to unlock the lock in case of an emergency.

Rechargeable lithium batteries power the lock lifetime of 2-3 months.

Overdrive cable version, 230V power supply (optional).

Basic color of SB Overdrive is black.

How would you like open the door?

- RFID card (IP65) / indoor lock-unlock button (image 1)
